

LOST CLASSICS IN PSYCHOANALYSIS: THE FABRIC OF AFFECT IN PSYCHOANALYTIC DISCOURSE BY ANDRÉ GREEN

with Garrick Duckler, LMFT, PhD

A VIRTUAL COURSE

COURSE DESCRIPTION

How do we think about the place of affect in Freudian thought and post-Freudian theory? What role does affect play in diagnosis, in the outcome of analytic therapy and what happens between analysand and analyst? Green's extraordinary study of affect in psychoanalytic theory explores the important aspects of the affect/representation opposition, how affect is conceptualized in neurotic and psychotic structures, affect as it appears in memory traces and within Oedipal conflicts. These and other aspects of affect raise questions on a myriad of topics including how we think about affect in "psychoanalytic speech," in its relationship to different theoretical models, as well as a crucial dimension of the analytic process as a lived experience.

LEARNING OBJECTIVES

1. Have a working understanding of how Green conceptualized affect in Freud's work and his overall view of psychoanalytic literature since Freud.
2. Describe Green's idea of "negative hallucination" and be able to speak to its relationship to clinical practice.
3. Have a working understanding of how Green understands the difference of affect within neurotic and psychotic structures.

DATES: 10/7, 10/14, 10/21,
10/28/21

TIME: 7:00 - 8:30 PM

CMES: 6.0
